Software Engineer with nearly 1 year of hands-on experience in full-stack development using the MERN Stack and Laravel. Proven ability to design, develop, and deploy production-grade web applications independently. Experienced in role-based authentication systems, backend business logic implementation, system migration, hardware-software integration, and end-to-end project delivery, including hosting and domain management.

TECHNICAL SKILLS

- Frontend: React.js, Tailwind CSS, Bootstrap
- Backend: Node.js, Express.js, Laravel
- Database: MongoDB, MySQL
- Languages: JavaScript, PHP, HTML5, CSS3
- Authentication & Security: JWT, Role-Based Access Control
- Deployment & DevOps: Hosting, DNS Configuration, Domain Setup, cPanel
- Tools: Git, GitHub, VS Code

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER & PROJECT MANAGER - BISWAS GROUP OF COMPANIES (JAN 2026 - PRESENT)

- Led end-to-end development and deployment of 2 production business websites using MERN stack.
- Managed complete system architecture including frontend, backend APIs, database design, hosting, and domain configuration.
- Implemented secure backend services and dynamic user interfaces aligned with business requirements.
- Recognized by senior management for outstanding technical performance and successful project execution.

SOFTWARE DEVELOPMENT ENGINEER - VINAYAN INDIA CONSULTING & SERVICES PVT. LTD. (JULY 2025 - DEC 2025)

- Developed and maintained software modules for Laser Speed Gun system used in real-time vehicle speed detection.
- Re-engineered and migrated system software from Ubuntu to Windows environment for improved deployment flexibility.
- Integrated additional hardware components including noise meter and automated audio feedback module.
- Provided technical troubleshooting, calibration support, and system validation for operational reliability.

SOFTWARE DEVELOPMENT ENGINEER(PAID INTERNSHIP) - XICONET TECHNOLOGY (APRIL 2025 - JULY 2025)

- Developed a Customer Management System using PHP and Laravel to efficiently manage and store bank customer and employee data.
- Built frontend components with React.js and CSS, implementing responsive UI and interactive features for a seamless user experience.
- Implemented full-stack functionalities, including API creation, database operations, and admin panel features (add, edit, update, delete, search).
- Collaborated across frontend and backend to ensure smooth data handling, retrieval, and management, improving overall system efficiency.

FULL STACK (UNPAID INTERNSHIP) - MANGOSORANGE SERVICES.PVT.LTD. (20 AUG 2024 - 5 OCT 2024)

- Developed a Customer Management System using PHP and Laravel to efficiently manage and store bank customer and employee data.
- Built frontend components with React.js and CSS, implementing responsive UI and interactive features for a seamless user experience.
- Implemented full-stack functionalities, including API creation, database operations, and admin panel features (add, edit, update, delete, search).
- Collaborated across frontend and backend to ensure smooth data handling, retrieval, and management, improving overall system efficiency.

KEY PROJECT

BISWAS MANPOWER OFFICIAL WEBSITE

LIVE PRODUCTION

- Developed and deployed a full-scale production website independently using the MERN stack.
- Managed complete front-end, back-end, database integration, hosting, and domain configuration.
- Designed responsive user interface and implemented secure backend data handling mechanisms.
- Executed full project lifecycle from requirement analysis to production deployment.

ATTENDANCE MANAGEMENT SYSTEM (MERN STACK) (OFFICE USES)

- Designed JWT-based role authentication (Admin, Sub-Admin, Employee).
- Built attendance tracking with monthly register and salary deduction automation.
- Implemented payroll logic with paid leave handling and deduction rules.
- Optimized MongoDB schema and REST APIs for efficient data processing.
